# Introducing CJC

CJC
Market Data. Optimized.

Established in 1999, CJC specialise in market data managed services, consultancy and products for the global financial markets community. Our solutions leverage cloud technology to improve and manage real time data distribution systems, as well as enhance the overall commercial management of market data.

As a vendor neutral partner, we can help you put in place tailored market data solutions that are right for your business and then manage your data infrastructure, freeing you to focus on your core business.

Leveraging our global footprint and economies of scale, we can provide 24/7/365 support to quickly and cost-effectively help you optimise your market data operations.
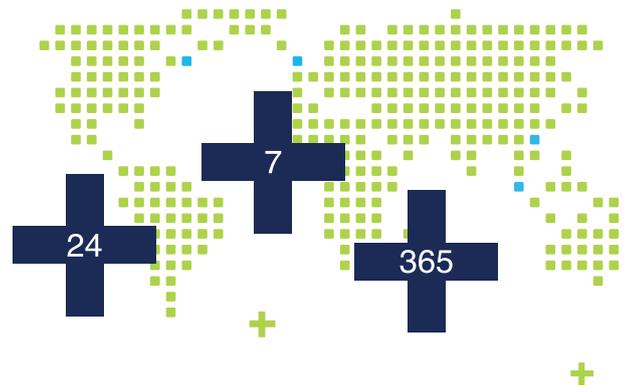

Optimised performance
Designing, testing, deploying and managing tailored market data infrastructure solutions

Flexibility
Delivering rapid upgrades and scalability through innovative cloud based solutions

Cost control
Transforming market data operations, both technically and commercially

Commercial management
Realising full value from your data vendors and third party services

Support Services

CJC's global support services team provide an enterprise level, market data infrastructure management service. Our uncompromising design, testing, deployment and management of applications ensure business as usual, without interruption. At the outset, we evaluate your specific demands and tailor a solution, from basic monitoring to full remote management. In every instance, our goal is to help you optimise performance and minimise costs.

Our support includes:
Market Data
Data Distribution
Tick Capture
Analytics
Contributions

Cloud Services

Our CJC Cloud Platform, a private cloud managed service, helps you meet your market data challenges in the key financial locations you need it. We have also created a suite of products that perfectly complement this platform, addressing big data visualisation and tools to assist rapid deployment of applications to the cloud.

Commercial Management Services

Better commercial management of market data enables you to realise full value from your data vendors and third party services, as well as improve cost control and compliance. We provide as little or as much support as you need – from a one off review project such as a 'mock audit', through to a fully managed service – delivering end-to-end managed solutions via best practice.

Who we work with:

REFINITIV   Goldman Sachs   J.P.Morgan   UBS   RBC Royal Bank
